

RISUAL LTD

# BUILDING A FLEXIBLE WORK ENVIRONMENT WITH MICROSOFT VIVA

# EMPLOYEE EXPERIENCE

## Overview

The client reached out to risual to discuss available options to empower their employees to adapt and thrive in a more flexible work environment.

With employee experience becoming an ever-increasing hot topic, the company wanted to ensure that this was at the heart of their business.

risual discussed Microsoft Viva with the client and identified that they would benefit greatly from the Microsoft Viva Insights Workshop where they could better understand how to empower managers, how to create culture and how to call upon Microsoft technology to digitally re-imagine the employee experience.

## Putting people first

Microsoft Viva is a platform which aims to support people, their goals, development, communication, collaboration, and wellbeing.

With the use of Viva, the council will immediately begin to see a shift in employee mindset, daily focus and overall mental health and wellbeing.

Aside from the personal benefits to each employee, it will also help support collaboration across teams, seamless communication and help strive towards a modern workplace.

risual spent 3 days with the business stakeholders within the organisation, gathering information on key business scenarios, showcasing the art of the possible through a Microsoft Viva overview and live demonstrations. The risual team then helped the business stakeholders address complex challenges and built a plan to help investigate next steps to integrate Viva
