DATA CONSULTANT

The Role Purpose

As a Consultant, you will be responsible for scoping, designing delivering, and deploying services based on the latest Microsoft Technologies in a field-based role. Delivering for large and enterprise clients across the UK, Consultants are required to ensure they help clients deliver the best value from their investment in Microsoft technology.

A risual Data Platform Consultant works with our clients to help them understand, organise, secure and govern data across their organisation.

The consultant will typically deliver data focused solutions for our clients hosted on Microsoft technologies such as SQL Server, specifically around the data analysis applications that the platform provides such as Power BI and SQL Reporting Services.

Duties

With a clear focus on delivering the best value, you will work through the complete consulting life-cycle, including (but not limited to):

- Customer liaison to project requirements, scope and integration with existing systems
- Development, configuration, integration, testing, optimisation, implementation and debug of bespoke customer solutions
- Testing of software applications or hardware devices that may be deployed to enhance solution
- Resolve technical issues and offer proactive technical support
- Development of tools that may be used by others to help provision, manage or troubleshoot deployments
- Documentation of solutions to ensure support teams and other consultants can participate in support and onward development

Specific role requirements and experience:

Primary technical skills:

- ETL/ELT
- Data Modelling
- Data Warehousing
- Azure SQL Database
- Azure Data Warehouse
- Azure Data Factory
- Transact-SQL
- DAX
- Power BI

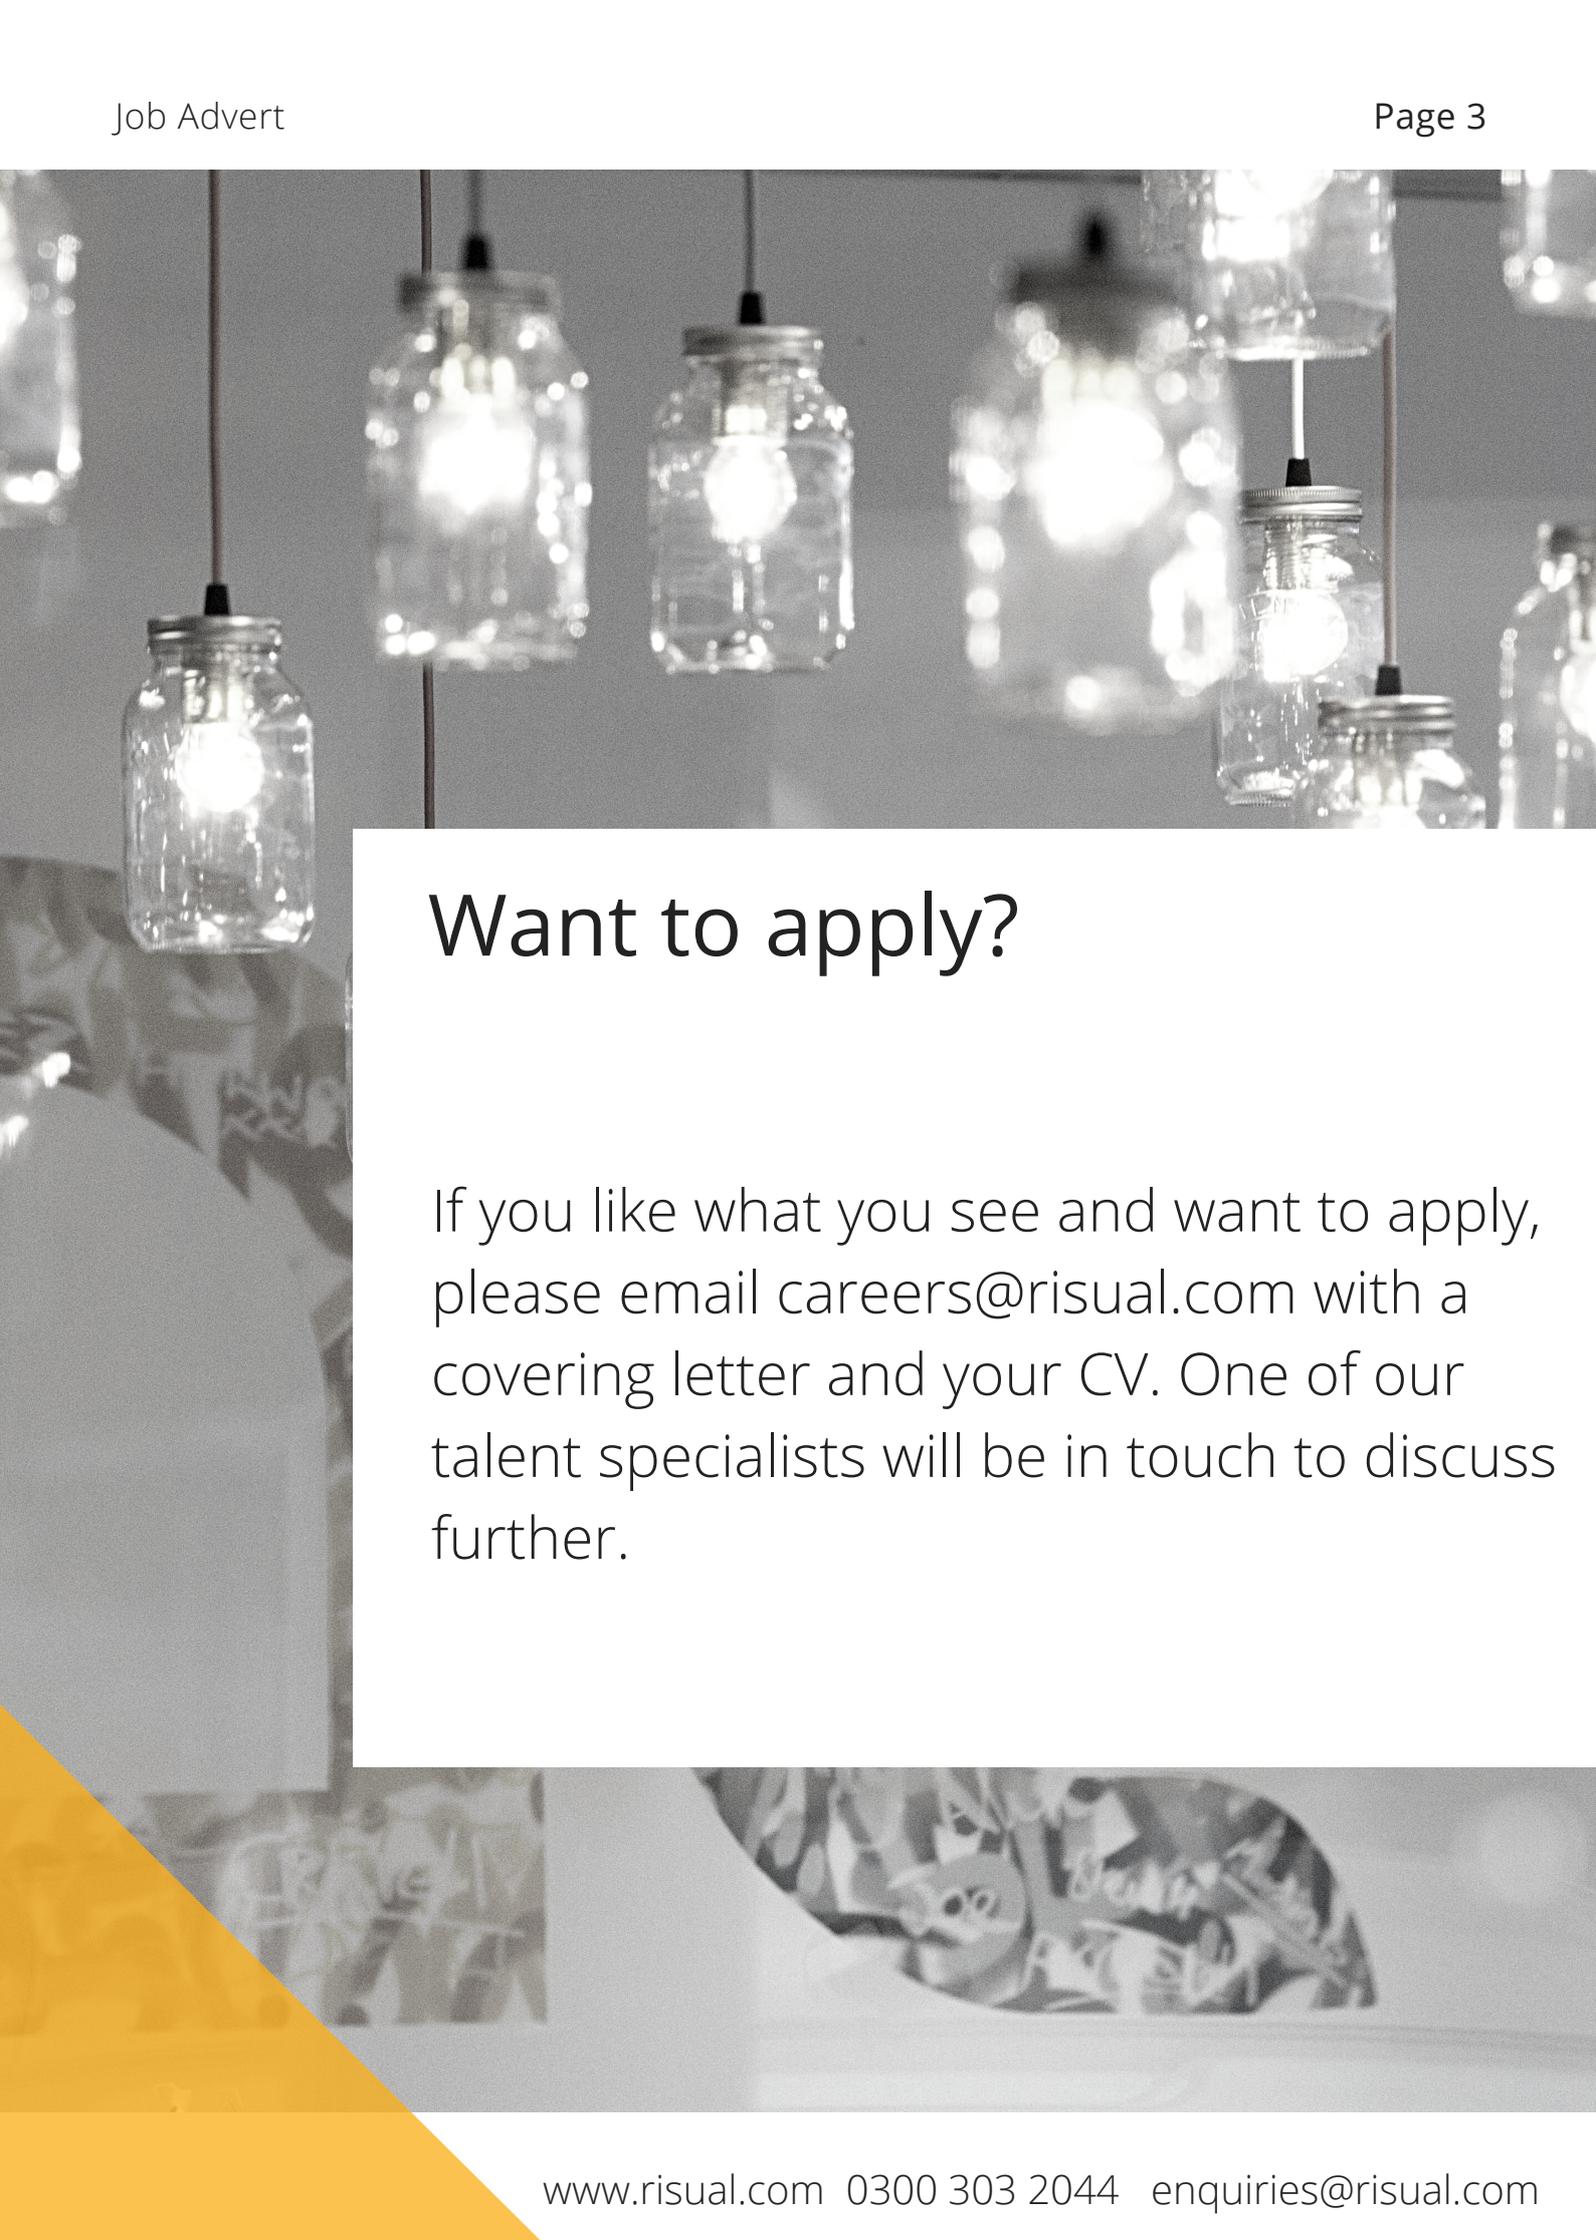

Secondary technical skills:

- Azure Synapse
- Python

Essential Criteria

To be successful in the role, you must be able to demonstrate the following skills and experience:

- Must hold or be able to successfully achieve and maintain NPPV3 with SC
- Able to evidence excellent customer service skills
- Excellent organisational skills
- Outstanding communication and technical skills
- Strong leadership skills
- Ability to demonstrate specific technology specialisms within the Microsoft stack
- Strong documentation skills
- Strong problem-solving skills
- Understanding and apply security principles
- Comfortable with demanding client interaction and leading business and technical discussions with internal and external stakeholders

Want to apply?
